

AUTOTEST / AUTOSOLO 2018

A few points have been noted:

1. Clarification from MSA Technical-
Autosolo - page 215 of the MSA Year Book - A Summary of Key Requirements
- under "Maximum cc" - an asterisk is missing which therefore confirms that the maximum
cc is unlimited when the driver holds a full RTA Licence.
2. Note that standard production hybrid and electric vehicles are allowed to compete in
autosolo / autotest events in the appropriate road car class.
3. Not easy, but could clubs please have some consideration when picking dates to avoid
obvious clashes - eg more than one "junior drivers" or major autosolo / autotest type event
in the same weekend.
