

Lothian Car Club Report SACC Meeting 20th February 2018

The club will celebrate 50 years of Doune Hillclimb in June, to mark the event there will be a get together on the Saturday night of the June National Weekend, we hope to have several past champions at the event along with some interesting competition and static cars.

Over the winter we discussed upgrades to the marshals posts which have been approved by the MSA so as the weather improves these will take place in time for the first event in April.

Our regulations are available and entries are coming in for our first event, last year we were blessed with good weather in the main so are hoping for the same, more and more competitors camp with us so it's nice for them if we get decent weather.

Our landlord continues to support the club in improvements to the site and we meet this week to discuss further budget proposals for upgrading safety elements as well as some improvement in the timing/results systems.

Our website has had a tweek or two over the winter and is now very much mobile friendly, these improvements will continue along with a greater presence in social media.
