

John Ryan gave a presentation on Electric Motorsport

There was a general view would become more prevalent within our sport, but was still sometime away in becoming the major part.

Colin Clark E Sports

There appeared to be a greater understanding and acceptance with regard to Esports that even that of 12 months ago, having been involved in this I can certainly say it will play a part in all ours futures and we must be aware,

Equality Diversity and Inclusion.

The Chair and the Chairman of MSUK made it very clear of the need to understand and embrace this subject going forward, it was said that we are all perhaps guilty of not realising how we can make a difference.

Again if anyone has a question please make contact

I think it very important to acknowledge and express our gratitude to everyone at whatever level in our community who have contributed to allowing motorsport to take place in these difficult times throughout the nation

Kind Regards

Sandy Denham
