Report of Historic Technical Committee for SAMSC Meeting 16 March 2021

There have been no meetings of the Historic Technical Committee since the last meeting of SAMSC, the next one being scheduled for 23 March.

There has however been an initial meeting of the Sustainability and Environmental Working Group.

This working group is mainly targeted at looking at the challenges facing Historic Motorsport in these areas and identifying any actions required to ensure the ongoing viability of the sport.

The sorts of things that are being considered include ways to proactively demonstrate the environmental relevance of the sport and to counter any negative public perception of the continuing use of “non-green” vehicles.

Other more practical issues such as continued availability of fuel for Historic Vehicles and the competitor demographic are also being looked at.

As always if anyone has any issue they wish to be raised then let me know.
