

The meeting commenced with Hugh Chambers providing the Bicester move and investment strategy, this produced a lengthy debate, after which the committee requested the CEO return to the Board and advise that Permit increase were too high, a response has been received to this request, and the increase reduced to £5.00, not exactly what we wanted but at least something.

Following that a number of Race matters were discussed, one important matter that we are currently appraising is accident statistics, we have requested more information for the next meeting, if other disciplines have an interest I sure Pete and I can make this happen for you.

I am to answer any questions where I can.

Kind Regards
Sandy Denham
