

Race Committee Report

Race Committee.

There, as is usual nothing that would directly affect clubs here, however two discussions took place that will become part of life for all clubs and they were firstly Marshal training reference electric vehicles and what would be put in place going forward, and secondly two clubs had been provided with alcohol testing kits, it was felt by the committee that this should be carried out by representatives of Motor Sport UK and not a club official, it was thought prudent to check with the legal status of this.
