### **Report of Historic Technical Committee for SAMSC Meeting June 16 2020**

There have been no meetings of the Historic Technical Committee this year, the meeting due in March having been cancelled.

The next meeting is scheduled for 14 July 2020.

No agenda has yet been set but items on the agenda from the meeting in March include sustainability of Historic Motorsport and environmental considerations.

Technical matters include use of 4 bolt heads on BDG engines and exemptions from safety equipment for period defined vehicles.

As always if anyone has any issue they wish to be raised then let me know.

**Graham Couser**
