

Race Committee
24-06-20

A large part of the meeting was spent on discussing COVID-19 and the Event Resumption Guide, the general feeling was of a positive nature and many aspects that were being introduced could be considered for inclusion for the future, it was also acknowledged that MSUK had done a good job and all involved should be congratulated, it was also noted that great care should be taken over future investment in the sport for the foreseeable future.

A number of other issues were discussed related to racing, one topic that does effect all disciplines is the recording of accident statistics, this has been on our agenda for a period of time, John Ryan is initiating discussion wit CAMS regarding an APP for this purpose, the group felt it was important that Category Definition was vital, process now on going.
